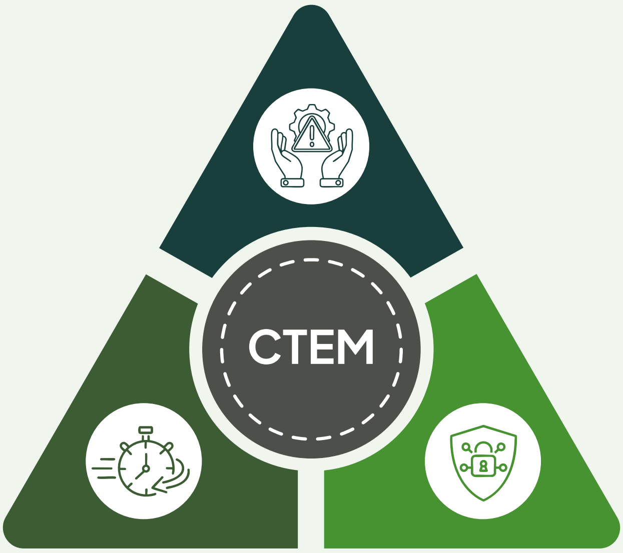
SECURX

Continuous Threat Exposure Management (CTEM)

A Proactive Defense for the Evolving Threat Landscape with Continuous Threat Exposure Management.

WHY SECURX?



OVERVIEW

SECURX CTEM focuses on continuous evaluation of threats, enhancing an organization's readiness against potential risks.

This approach allows organizations to adapt quickly to the evolving threat landscape, maintaining strong defenses.

CTEM ensures better protection of sensitive data and systems by continuously assessing vulnerabilities and threats.

> **“ Organizations prioritizing their security investments based on a continuous exposure management programme will be three times less likely to suffer from a breach.**

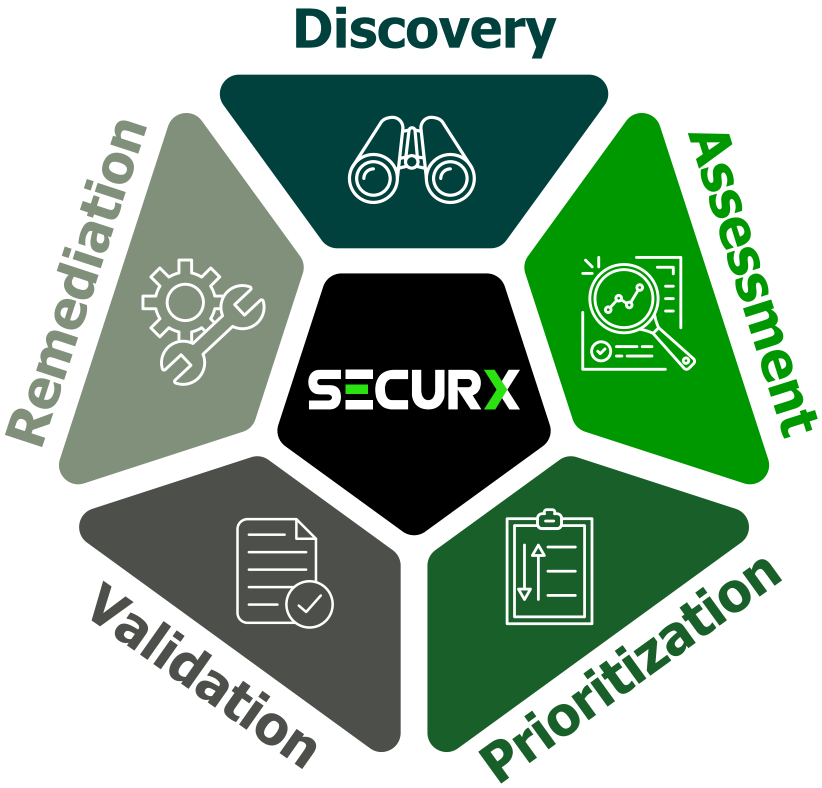
CTEM FRAMEWORK

DISCOVERY
Identify all assets, software, devices, and systems within the organization's environment.

ASSESSMENT
Analyze identified assets for vulnerabilities and their potential exposure to cyber threats.

PRIORITIZATION
Rank vulnerabilities based on their severity, potential impact, and likelihood of exploitation.



VALIDATION
Regularly test to validate the effectiveness of implemented security controls and mitigation measures.

REMEDIATION
Apply countermeasures to reduce the risk of successful attacks, such as patching, configuration changes, or security controls.
